

L4 cross-plan strategy — distance-driven, tiered, all-49-allele coverage

Aim 1 (Y1): test the L3 LUMPINGS within multi-member Fgs | Aim 2 (Y1-3): generate missing homozygotes | Aim 3 (Y2-4): map the SI→SC threshold across the Fg landscape

A | Fg landscape — Year-1 cross-plan overlay

MDS on 30-Fg core | node area ∝ # L1 members | gold halo = Aim-1 within-Fg focus | edges = Aim-3 sample

B | FG001 internal — 10 L1 alleles

MDS on the within-FG001 full-S-domain Hamming (0-6) | node area ∝ # carriers
