

Random-mating viability per Element Occurrence

Strict tetraploid sporophytic SI ($L = 0$). Left-edge square = parent BL.

Error bars = bootstrap 95% CI (1000 resamples).

Dashed line = 0.40 (random-mating threshold); dotted line = 0.20 (effectively failed).

Random-mating status

Color	Status	Range
Red	Failed	(< 0.20)
Orange	Struggling	(0.20 - 0.40)
Green	Sustainable	(>= 0.40)
