

Phase 5 — per-population observed seed yield vs size expectation (all populations with ≥ 2 plants, n = 37 populations across 2 years)

○ 2025 (open)    ● 2026 (filled)    ---- on species curve (fold = 1)    ○ red halo = FDR < 0.05 below for that (pop, year)

= observed yield ÷ expected from size (log scale) · < 1 = seed shortfall · red halo around a dot = FDR < 0.05 below for that (population, year)
